

## BARD® LABSYSTEM™ PRO EP Recording System Data Interface

An Integrated  
Approach

### An EP Data Management Solution to Support Your High Performance EP Program

*Do you find yourself wasting time chasing down all of the different patient data reports from your EP case? Do you worry that you won't be able to find the clinical information you're looking for when you go back to the patient record? Would you like to have patient data available to you in one place at the conclusion of the EP procedure?*

Introducing the XLink Data Interface that links the LABSYSTEM™ PRO EP Recording System with Philips Xper Information Management Physiomonitring 5 system. Now your EP clinical data can be imported into your Xper Physiomonitring 5 system to create a comprehensive case report that includes vitals, charting and select EP data. The report can be reviewed on the Xper Physiomonitring 5 system, and the data can be exported to the hospital information system (HIS) via standard HL7 data transfer.

For more information or a demonstration, call your Bard Electrophysiology Territory Manager today at (800) 824-8724.

### The Convenience of Patient Data in One Location

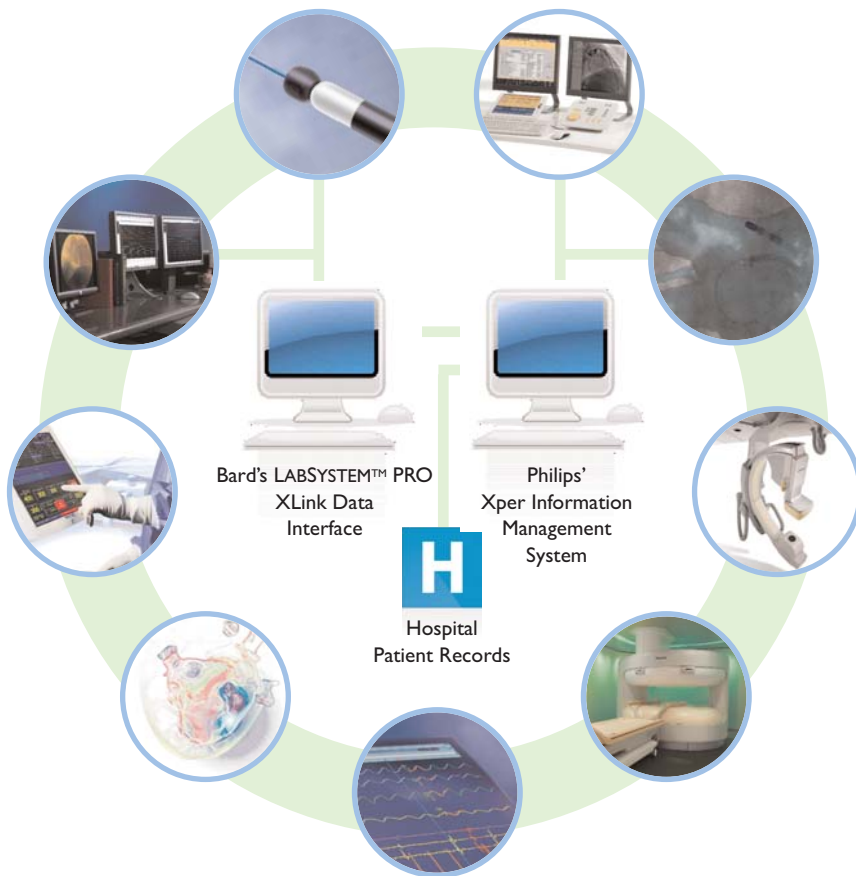

- Collect important EP procedure data on a single system for easy review
- Harmonize your EP report to save record-keeping and information management time
- Incorporate EP events and details into a comprehensive query-able database that lets you evaluate resource utilization and patient care trends to optimize EP practice management and support research
- Share demographic data to minimize data entry errors

## Comprehensive Data in One Place

### LABSYSTEM™ PRO EP Recording System

LABSYSTEM™ PRO EP Recording System combines a fully-customizable user interface, the latest hardware technology, and unique software capabilities to provide state-of-the-art EP recording.

With a rich history and many years of experience focusing on electrophysiology, Bard Electrophysiology continues to develop products for users, by continuing to collaborate with physicians around the world. From recording systems and cardiac stimulators to catheters and accessories, Bard Electrophysiology offers an array of solutions.

Please contact your Bard Electrophysiology Territory Manager for more information on our full line of EP products and services: (800) 824-8724.

## LABSYSTEM™ PRO XLink Data Interface Features

- XLink software resides on the recording system so no additional hardware is required
- Simple, menu-driven data export at the end of the EP procedure doesn't slow down the lab
- Automated report generation on Xper Physiomonitring 5, with multiple report templates and optional customization, meets the needs of a range of sites and users
- Procedure information—including events, intervals, demographics and details—is automatically included with the export to the Xper database, minimizing manual data entry
- EP data inclusion in the HIS is managed through Xper Physiomonitring 5, eliminating multiple records from the same case and minimizing manual entry
- Optional Philips Xcelera PACS link to Xper Physiomonitring 5 for access to image data

## Ordering Information

Catalog No.	Description
2001439	LABSYSTEM™ PRO XLink Data Interface

Before use, consult product labels and inserts for any indications, contraindications, hazards, warnings, cautions and instructions for use.
